

Module 3: Campaign CRUD & Integration (Week 3)

Objective:

To implement the core API endpoints required for data consumption on the homepage and to integrate the 'Start a Fundraiser' feature.

Scope of Work:

1. API Controller Setup
 - CampaignController with CORS enabled.
2. Read Functionality
 - GET /api/campaigns returns all campaigns.
 - Frontend fetches data dynamically.
3. Create Functionality
 - POST /api/campaigns saves new campaign.
 - Validation and ErrorResponse added.
 - Fundraiser.jsx submits data.

Key Deliverables:

- Dynamic homepage data.
- Functional fundraiser form.
